

AppleFrack your Job finding and hiring Assistant

Greensboro, March 25th. The world's greatest tech job search engine and preparation app was launched. AppleFrack, AppleFrack's main goal is to help you get a job after school or during school. The app works as your digital assistant and a search engine to help make your search and preparation for whatever role you're looking for easier.

The job market is tough with thousands of students graduating college and bootcamps but not having the experience in the industry for companies to hire them or not knowing what skills are needed for the roles they're looking for or even not knowing what jobs would suit them

However, what if there was a solution for these problems?. One that would work with the student during every step of the job search process by finding jobs best suited or related to the user's major or specific jobs is that the user is looking for one that would keep track of the applications, that they've sent as well help the user practice, the skills they need for these roles and that's where AppleFrack comes in .

The goal of AppleFrack is to make the user's job application process easier and to display the necessary skills to obtain the position of choice. After using AppleFrack the user should be more confident and organized about what kind of role they want and what skills are needed to get them.

"I was suspicious of AppleFrack at first thought it was some fake scam app the way my classmates were talking about it but when they showed me what AppleFrack is and how it worked I understood why instantly its such an easy app to use and the preparation questions it recommends are realistic I had an interview and they asked me the same sort of questions and I already knew what to say thanks AppleFrack"

In order to use AppleFrack, a student would enter their name, major, and skills that they have. From there, students can select a position that would interest them in their particular fields. Once they have selected a position, students can either select the interview questions or the projects and skills that would look good for their resume based off that position.

FAQs:

1.Can I use this on multiple devices ?

Yes you can AppleFrack will work on IOS and android

2. Where is AppleFrack getting their suggested projects and questions from?

AppleFrack gets its information from job posting websites, employer databases, industry associations, professional networks, and user-generated data.

3. Does AppleFrack cost any money?

No AppleFrack is free for now but in the future higher level features will cost a minor fee.
